

Stealth.money QA BUG REPORT

Defect 1

Bug ID: TC 002

Description: Accepted Invalid Email.

The valid structure of any email is: "[local-part@domain.tld](#)". In this case, the extension (TLD), the ".com/.co" extension is missing.

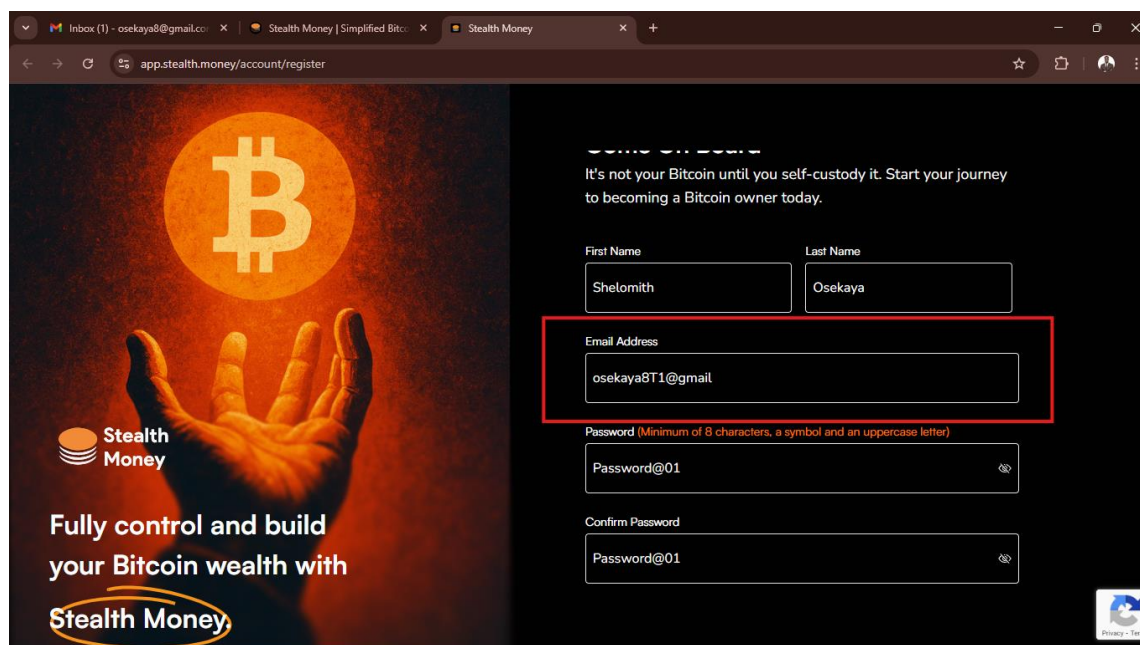

Steps to reproduce

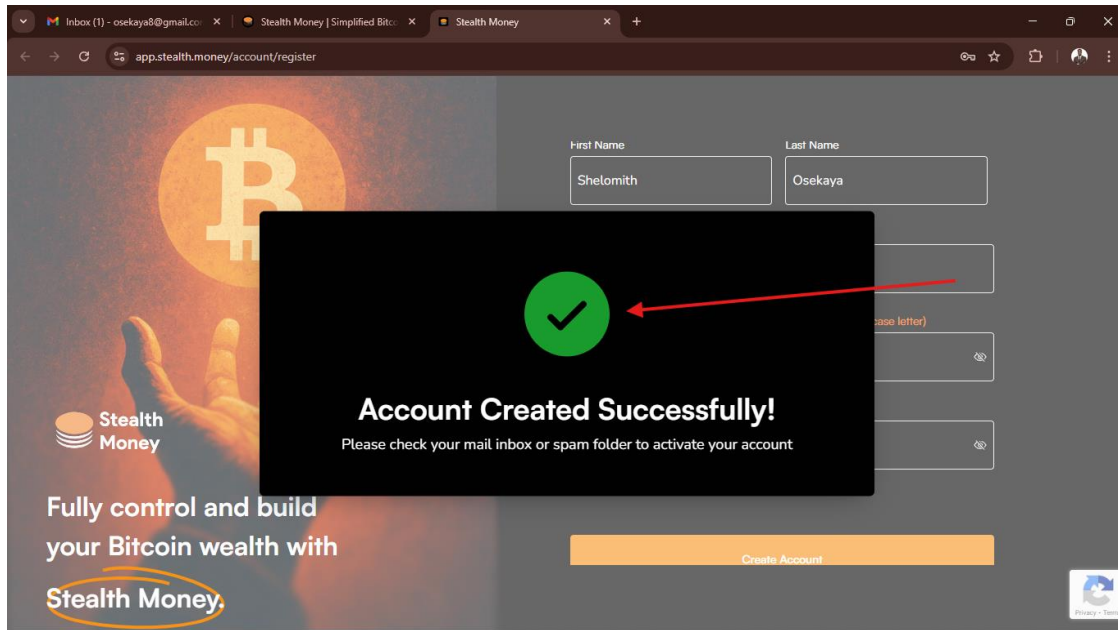

1. Navigate to the registration page: <https://app.stealth.money/account/register>
2. Fill in the fields.
3. inside the E-mail field, enter any mail without the Total Level Domain extension (Eg; osekaya8T1@gmail).
4. Click the create account button.

Expected result: The System is supposed to display email validation errors.

Actual result: The System shows accounts created successfully instead.

Screenshot:

Defect 2

Bug ID: TC 005

Description: The registration form submits even though the First-Name & Last-Name fields are blank.

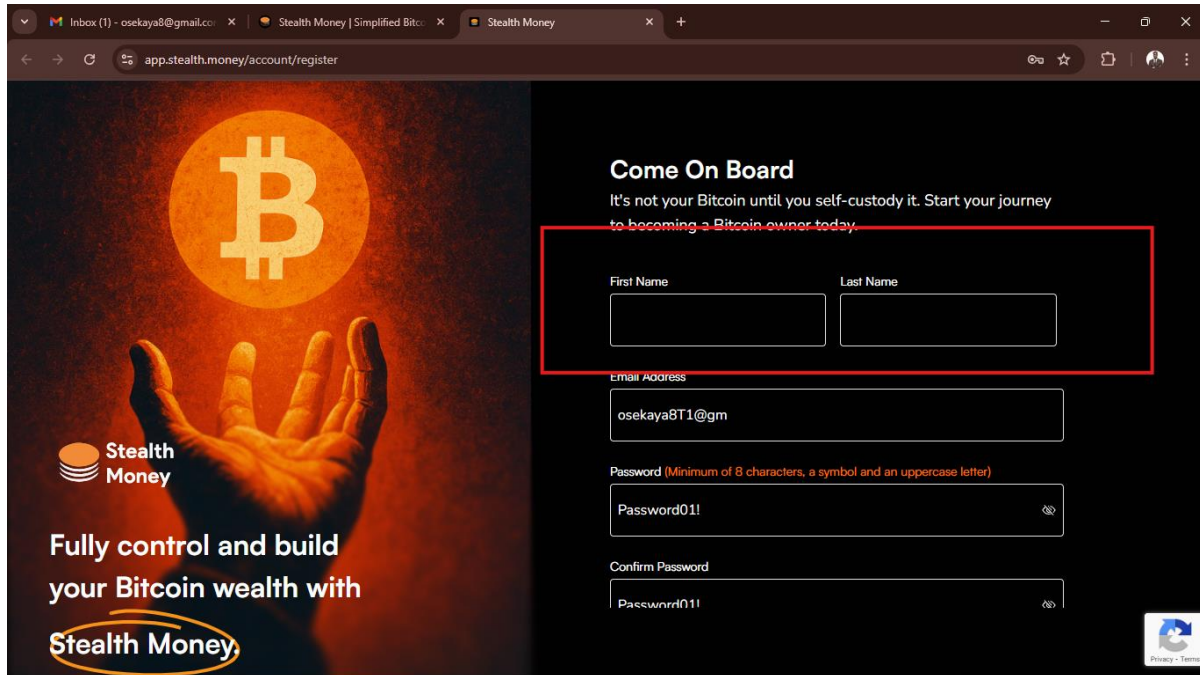

Steps to reproduce

1. Navigate to the registration page: <https://app.stealth.money/account/register>.
2. Leave the "First-Name & Last-Name" fields empty.
3. Fill in other fields with valid details.
4. Click the create account button.

Expected result: Name Fields should be a Required Field, and the System is supposed to refer you back to the empty name field.

Actual result: The System shows accounts created successfully instead.

Defect 2 Screenshot:

The screenshot shows the registration page of the Stealth Money application. The page has a dark theme with a Bitcoin logo and a hand holding a coin. The registration form is on the right side, and the 'Stealth Money' logo is on the left. A red box highlights the 'First Name' and 'Last Name' input fields.

Come On Board
It's not your Bitcoin until you self-custody it. Start your journey to becoming a Bitcoin owner today.

First Name

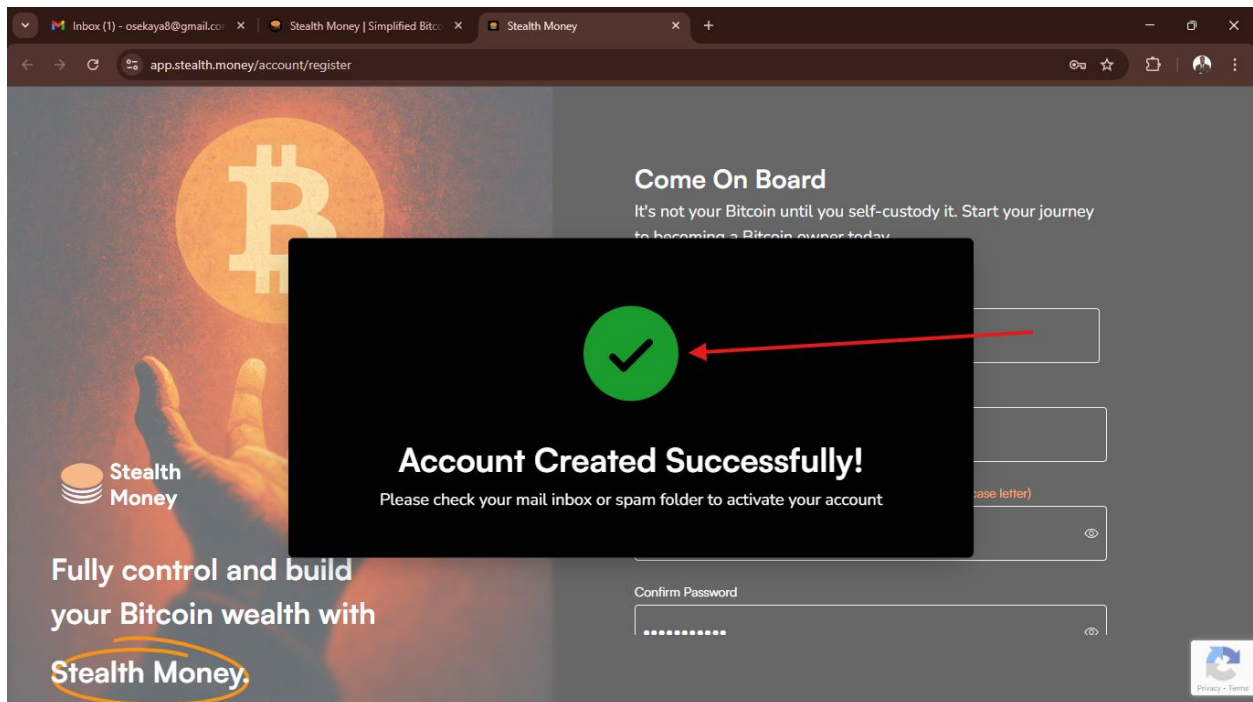

Last Name

Email Address

Password (Minimum of 8 characters, a symbol and an uppercase letter)

Confirm Password

Stealth Money
Fully control and build your Bitcoin wealth with **Stealth Money.**

The screenshot shows the same registration page as above, but with a success message overlay. The overlay is a dark rectangle with a green checkmark icon and the text 'Account Created Successfully!'. A red arrow points from the 'Last Name' field to the success message. The background is dimmed.

Fully control and build your Bitcoin wealth with **Stealth Money.**

Defect 3

Bug ID: TC 006

Description: The registration page loads while all fields are empty. It's reason for not submitting is not the exact reason. It doesn't redirect you back to the empty fields. It only pop-ups a notification that shows "Password not strong enough".

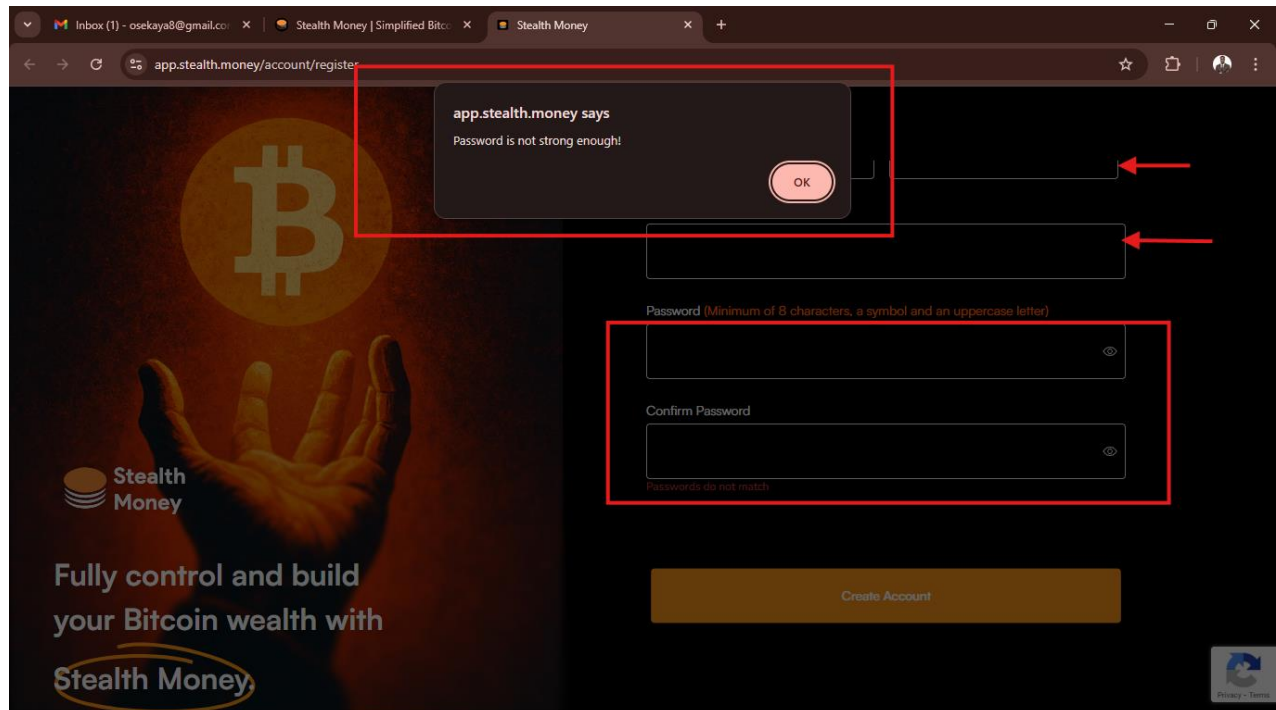

Steps to reproduce

1. Navigate to the registration page: <https://app.stealth.money/account/register>.
2. Leave all fields blank.
3. Click the create account button.

Expected result: All Fields should be a Required Field, and the System is supposed to refer you back to fill the empty name fields.

Actual result: It doesn't create an account successfully, but it also doesn't redirect you back to the empty fields. It only pop-ups a notification that shows "Password not strong enough".

Defect 3 Screenshot

Defect 4

Bug ID: TC 014

Description: Tried to reset password using unregistered email and it was accepted.

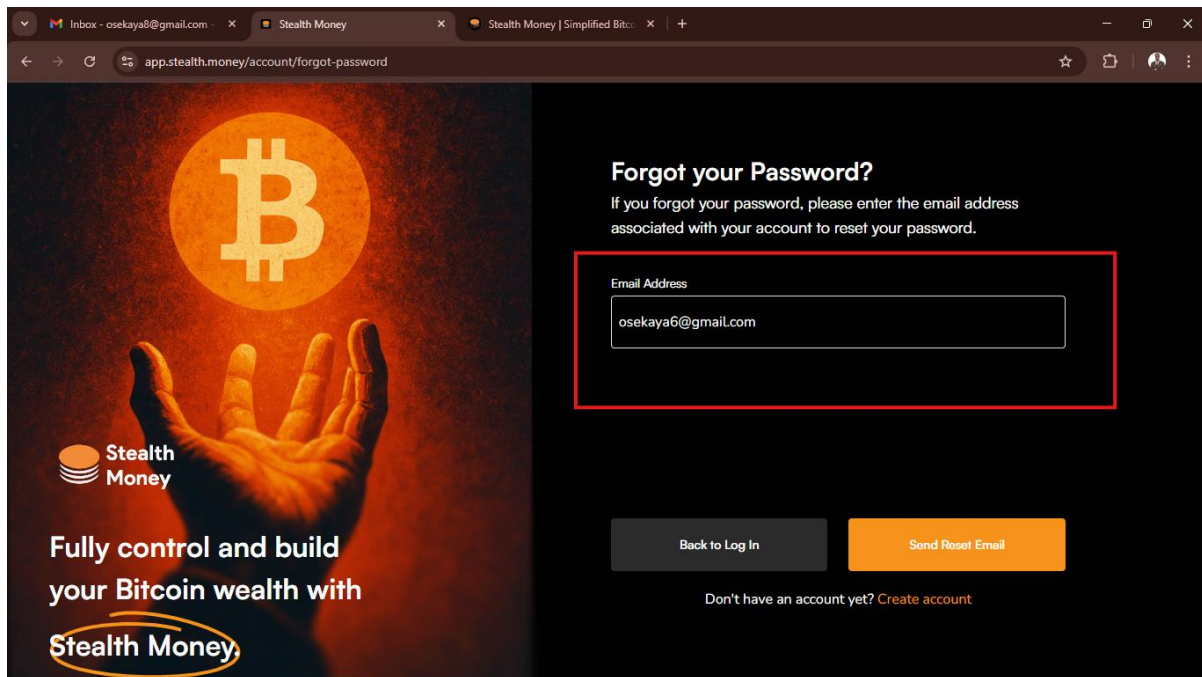

Steps to reproduce

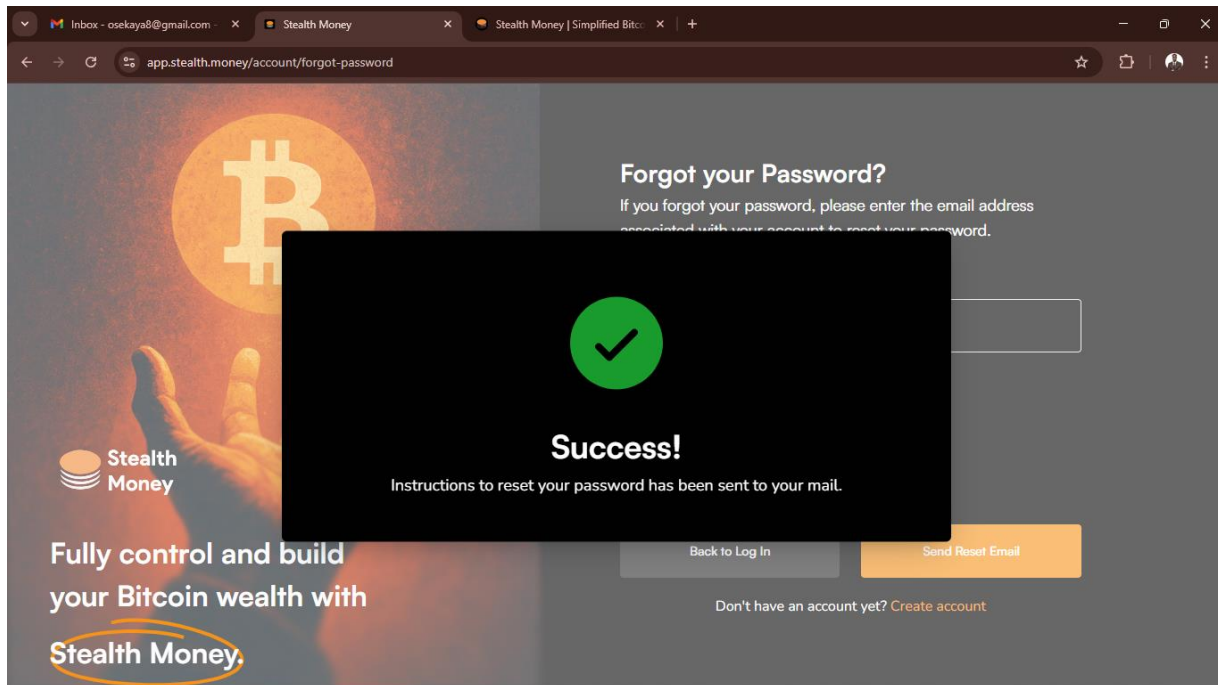

1. Navigate to <https://www.stealth.money/>
2. Click on the log-in button to go to the log-in page.
4. Click on the forgot password.
5. Enter any unregistered email (eg: osekaya6@gmail.com).

Expected result: It should not be accepted, and an error message should be displayed.

Actual result: It shows accepted and sent a reset password mail to the email.

Defect 4 Screenshot:

Defect 5

Bug ID: TC 019

Description: There are a couple of issues in this bug: The process to purchase BTC is faulty if a user conducts multiple transactions.

1. The process worked the First & Second time I conducted the transaction, but on the third trial, it became buggy. It worked on the 4th & 5th trials, but refused to work again since then It keeps bringing up error notifications as highlighted in the image below.
2. It says (tries to enforce) a user not using the same wallet address more than once, (I think that should be optional and not mandated) but most users cannot have more than one/two wallet addresses. It needs to be looked into.
3. It doesn't bring up the XPub payment option. Is it because I didn't register my Xpub details? Is it supposed to work like that?

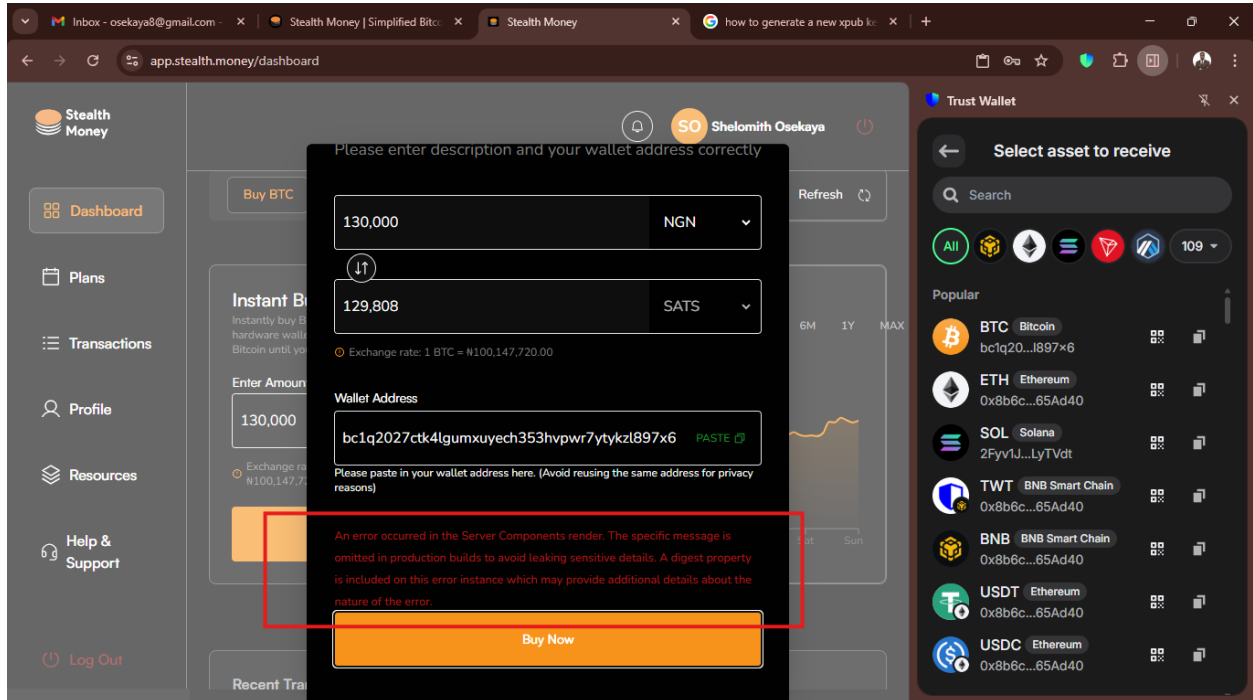

Steps to reproduce

1. Navigate to <https://www.stealth.money/>.
2. Click on the log-in button to go to the log-in page.
3. Log in with details. (must be verified).
4. Enter the amount of BTC to buy. Click on "Buy BTC".
5. Complete the purchase.
6. Initiate the process 2 more times with the same wallet address.

Expected result: The Purchase flow should begin.

Actual result: It shows error notification and can't proceed to the next step.

Defect 5 Screenshot:

Defect 6

Bug ID: TC 020

Description: There are a couple of issues in this bug: The process to purchase USDT is faulty. I couldn't perform a single transaction successfully.

1. The Purchase process didn't process at all just two kinds of error notifications. (I used a USDT wallet address under TRC20 as instructed). I tried multiple addresses, but it still didn't work.
2. It also has a similar bug with the "**Defect 5**". (enforcing users to use a different address each time).
3. It doesn't bring up the XPub payment option. Is it because I didn't register my Xpub details? Is it supposed to work like that?

Steps to reproduce

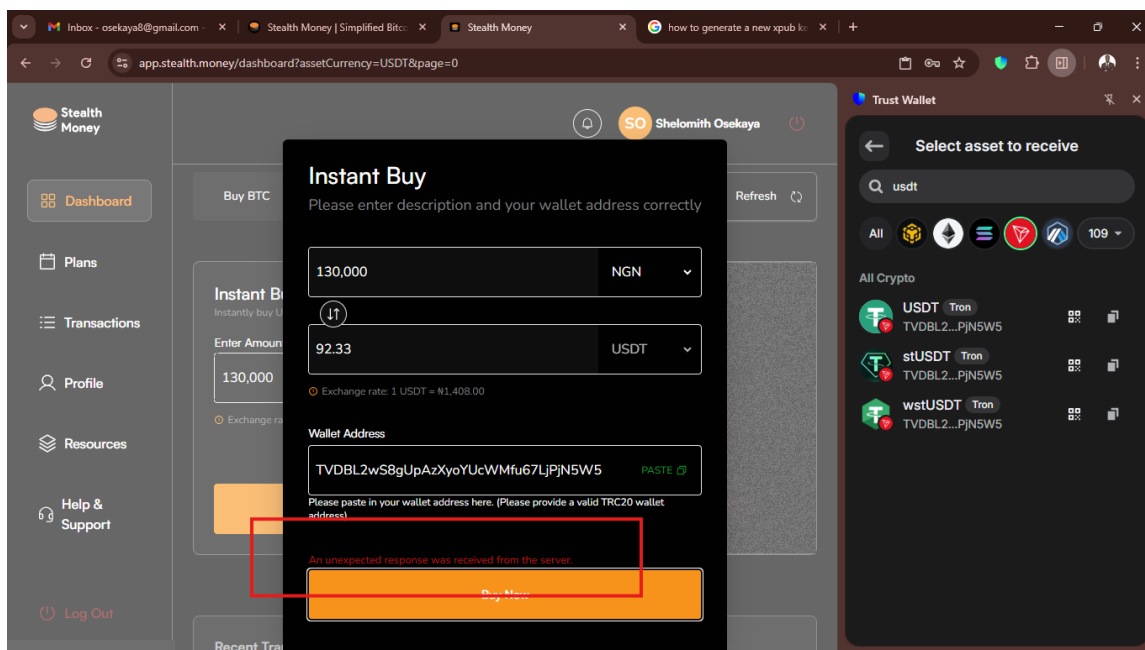

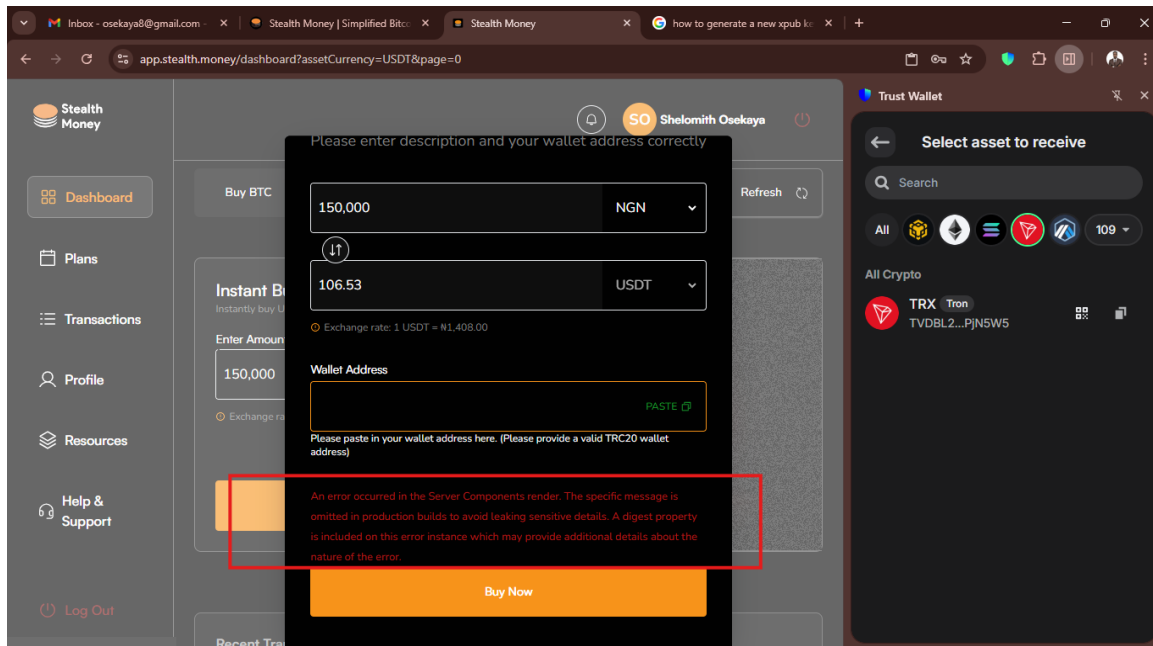

1. Navigate to <https://www.stealth.money/>.
2. Click on the log-in button to go to the log-in page.

3. Log in with details. (must be verified).
4. Enter the amount of USDT to buy. Click on “Buy USDT”.
5. Complete the purchase.

Expected result: The Purchase flow should begin.

Actual result: It shows error notification and can't proceed to the next step.

Defect 6 Screenshot:

Defect 7

Bug ID: **Other Discovered Bug** (Not part of Test case)

Description: The Notification button and the Profile name (button) do not work. I think it should work. Also on that note, I think the logo should be functional as well to redirect users back to the dashboard when clicked.

Steps to reproduce

1. Navigate to <https://www.stealth.money/>.
2. Click on the log-in button to go to the log-in page.
3. Log in with details. (must be verified).
4. Click on the Notification button on the top right corner of the screen.
5. Click on the User profile button on the top right corner of the screen.

Expected result: The specified elements should be a link and redirect users to the specified page/screen.

Actual result: It doesn't work.
