

Stealth.money Test Closure Report

PROJECT INFORMATION

Project Name: Stealth.Money

Feature Tested: All Features, Functions and Buttons.

Environment: <https://www.stealth.money/>

Tester Name: Shelomith Osekaya

Test Cycle: Three Test Cycle (Initial Testing, Functionality Testing, End-End Testing).

Test Start Date: 11th March, 2026.

Test End Date: 15th March, 2026.

SCOPE OF TESTING

The objective of this testing cycle was to validate the functional and non-functional behavior of the crypto transaction system. The following modules were tested:

1. User Registration
2. User Login
3. Password Reset
4. User Dashboard
5. KYC Verification
6. Crypto Purchase
7. Amount Input
8. Satoshi Conversion Display
9. Wallet Address Input
10. Virtual Account Generation
11. Payment Processing

- 12. Blockchain Transaction Link
- 13. Transaction History
- 14. Navigation Menu

TESTING PERFORMED

1. Functional Testing

Verified system features based on requirements.

Status: Completed

2. UI Testing

Verified user interface layout and visual elements.

Status: Completed

3. Validation Testing

Tested system behavior with invalid inputs.

Status: Completed

4. Boundary Testing

Tested system with minimum and maximum input values.

Status: Completed

5. Usability Testing

Checked ease of use and user flow.

Status: Completed.

6. End-to-End Testing

Tested full user journey from registration to crypto transfer.

Status: Completed.

7. Compatibility Testing

Tested system behavior across browsers and devices.

Status: Completed

8. Exploratory Testing

Tested application behavior through random interaction.

Status: Completed

TEST EXECUTION SUMMARY

Total Test Cases Designed: 53

Total Test Cases Executed: 53

Test Cases Passed: 42

Test Cases Failed: 5

Test Cases Blocked: 6

DEFECT SUMMARY

Critical Defects: 2

High Severity Defects: 3

Medium Severity Defects: 1

Low Severity Defects: 1

Total Defects Found: 7

DEFECT LOG

BUG-01

Description: Accepted Invalid Email.

The valid structure of any email is: "local-part@domain.tld". In this case, the extension (TLD), the ".com/.co" extension is missing.

Severity: High

Status: Fixed & Cleared.

BUG-02

Description: The registration form submits even though the First-Name & Last-Name fields are blank.

Severity: Critical.

Status: Fixed & Cleared.

BUG-03

Description: The registration page loads while all fields are empty. It's reason for not submitting is not the exact reason. It doesn't redirect you back to the empty fields. It only pop-ups a notification that shows "Password not strong enough".

Severity: High

Status: Fixed & Cleared.

BUG-04

Description: Tried to reset password using unregistered email and it was accepted.

Severity: Medium.

Status: Fixed & Cleared.

BUG-05

Description: There are a couple of issues in this bug: The process to purchase BTC is faulty if a user conducts multiple transactions.

1. The process worked the First & Second time I conducted the transaction, but on the third trial, it became buggy. It worked on the 4th & 5th trials, but refused to work again since then It keeps bringing up error notifications as highlighted in the image below.
2. It says (tries to enforce) a user not using the same wallet address more than once, (I think that should be optional and not mandated) but most users cannot have more than one/two wallet addresses. It needs to be looked into.

It doesn't bring up the XPub payment option. Is it because I didn't register my Xpub details? Is it supposed to work like that?

Severity: High

Status: Fixed & Cleared.

BUG-06

Description: There are a couple of issues in this bug: The process to purchase USDT is faulty. I couldn't perform a single transaction successfully.

1. The Purchase process didn't process at all just two kinds of error notifications. (I used a USDT wallet address under TRC20 as instructed). I tried multiple addresses, but it still didn't work.
2. It also has a similar bug with the **"Defect 5"**. (enforcing users to use a different address each time).

It doesn't bring up the XPub payment option. Is it because I didn't register my Xpub details? Is it supposed to work like that?

Severity: Critical.

Status: Fixed & Cleared.

BUG-07

Description: The Notification button and the Profile name (button) do not work. I think it should work. Also on that note, I think the logo should be functional as well to redirect users back to the dashboard when clicked.

Severity: Low.

Status: Fixed & Cleared.

Risks & Limitations

1. Testing was conducted in a controlled (staging) environment.
2. Real financial transactions were not executed.
3. Some external integrations may require further testing in production environments.

Overall Test Result

Based on the executed test cases and defects identified, the system has undergone comprehensive testing across major functional and non-functional areas.

QA Recommendation

1. Based on the testing carried out, and the subsequent fixes, the site is ready for release.
